Cycle Record Time

Optional Looping intervals are Off, 1,2, 3, and 5 minutes. If you open the "Looping", the recorded file will be divided into multiple sections written into the memory card, the camera will record until memory card is full, and then overwrite the previous recorded small section content.

Recording Volume

ON/OFF optional.

WDR

Implies that the camera can handle bright and dark conditions and improve quality of freeze frames. ON/OFF optional.

Auto low Light

Auto Low Light mode intelligently changes frame rate based on lighting conditions, increasing exposure time for optimal low light performance.

04 | Camera Settings

2. Camera Setting

Sight

This optional setting is able to turn the sight function ON/OFF. The sight can be adjusted during live streaming through pressing the arrows. The sight can be bore-sighted with your firearm, to align the aim of the BSP camera and your firearm.

Image Rotate

Provides the option to rotate the orientation of your video according to the desired mounting on the selected firearm.

Light Frequency

Light Frequency can be adjusted to Auto, 50Hz, 60Hz. If video footage flashes, adjust the light frequency for improved results.

TV Format

PAL and NTSC, Video format setting is mainly for watching the video on TV/HDTV, to control the record frame rate of recording and playback.

Video Coding

Optional formats are H.264 and H.265.

Video Stabilization

This setting optimizes video quality through stabilization technology

04 | Camera Settings

Quick Capture

Press the power / mode button once, camera starts recording immediately, press the power / mode button to shutdown the camera, press the Shutter / WiFi button to stop recording.

Stamp

When the Stamp function is turned on, you can attach the current time to a photo or video.

TV Out

TV signals can be output to other devices for different applications. This function requires corresponding accessories and needs to be purchased separately.

Beeper Sound

You can turn on or turn off the beeps.

Video timing Alarm

Your camera can be configured to start an alarm reminder for 3,5,10 minutes after recording, alarm continues until you press any button. This function could assist in preserving battery operation time.

05 | Mounting Setup

Step 1:

Select the desired mount. The barrel mount or the picatinny mount, slide the desired mount into the housing slots and secure the mount with the magnetic position block provided.

Step 2:

Turn the mounting lever to achieve the desired position, then lock the lever in position.

! NOTICE: Never over tighten the mounting lever threads. Never force the locking of the lever into position. This product was designed to withstand force and recoil if installed correctly. If the parts does not lock smoothly, restart the mounting setup process or contact our customer support division.

Visit our Youtube channel for pro tips on how to achieve the perfect mount, every time!
